ABOUT ME

Hello! I am a Mechatronic Engineer passionate about Programming ♥ when I was in high school I developed 2 videogames, the first using gamemaker and the second using Unity3D, I have developed an inventory for a Morelia mezcal group using C#, when I was doing my stays in **KOSTAL MEXICANA** I solved software problems, and now I'm determined to become a web developer. I have made websites as Freelance for companies like Cuellisound and personal projects using HTML, CSS, Less, JavasCript, React, Node, MongoDB, Express. I am looking for my first opportunity to show that I am a fast learner and problem solver.
